

Master Syllabus

ALH 1130 - Basic Life Support Training for Healthcare Provider

Division: Health Sciences

Department: Allied Health

Credit Hour Total: 1.0

Lecture Hrs: 1.0

Date Revised: March 2017

Course Description:

The American Heart Association (AHA) Basic Life Support for Healthcare Providers (BLS-HCP) is designed to train participants to save lives of victims in cardiac arrest through high-quality cardiopulmonary resuscitation (CPR). This course prepares healthcare professionals (those currently working in a healthcare setting or potential for working in a healthcare setting) to know how to perform CPR in both in- and out-of-hospital settings. The course includes adult, child, and infant rescue techniques, administration of the AED, and first aid. Those who successfully complete the course will receive an AHA Heartsaver First Aid Provider Card and AHA BLS for Healthcare Provider card, valid for two years.

General Education Outcomes:

- Critical Thinking/Problem Solving Competency

Course Outcomes:

Cardiopulmonary Resuscitation

Demonstrate skills to provide one- and two- person cardiopulmonary resuscitation to infants, children and adults.

Assessment Method: Performance appraisals

Performance Criteria:

100% on given rubric

Assessment Method: Standardized national examinations

Performance Criteria:

84% or better on given exam

Final Exam

Complete American Heart Association's Basic Life Support (BLS) written final examination as required for healthcare professionals.

Assessment Method: Standardized national examinations

Performance Criteria:

84% or better on given exam

Ventilation

Demonstrate proper use of pocket mask, bag-valve mask and ventilation to an artificial airway during resuscitation attempts.

Assessment Method: Performance appraisals

Performance Criteria:

100% on given rubric

Assessment Method: Standardized national examinations

Performance Criteria:

84% or better on given exam

Automated External Defibrillation

Recall rationale and technique for automated external defibrillation.

Assessment Method: Performance appraisals

Performance Criteria:

100% on given rubric

Assessment Method: Standardized national examinations

Performance Criteria:

84% or better on given exam

Foreign Body Airway Obstruction

Demonstrate skills to assess and manage foreign body airway obstruction in infants, children and adults.

Assessment Method: Performance appraisals

Performance Criteria:

100% on given rubric

Assessment Method: Standardized national examinations

Performance Criteria:

84% or better on given exam

Outline:

Coronary Heart Disease

Relief of Foreign Body Airway Obstruction

Cardiopulmonary Resuscitation

Automatic External Defibrillation
