

## Master Syllabus

### ALH 1130 - Basic Life Support Training for Healthcare Provider

**Division:** Health Sciences

**Department:** Allied Health

**Credit Hour Total:** 1.0

**Lecture Hrs:** 1.0

**Date Revised:** March 2017

---

#### Course Description:

The American Heart Association (AHA) Basic Life Support for Healthcare Providers (BLS-HCP) is designed to train participants to save lives of victims in cardiac arrest through high-quality cardiopulmonary resuscitation (CPR). This course prepares healthcare professionals (those currently working in a healthcare setting or potential for working in a healthcare setting) to know how to perform CPR in both in- and out-of-hospital settings. The course includes adult, child, and infant rescue techniques, administration of the AED, and first aid. Those who successfully complete the course will receive an AHA Heartsaver First Aid Provider Card and AHA BLS for Healthcare Provider card, valid for two years.

#### General Education Outcomes:

- Critical Thinking/Problem Solving Competency

#### Course Outcomes:

##### Cardiopulmonary Resuscitation

Demonstrate skills to provide one- and two- person cardiopulmonary resuscitation to infants, children and adults.

**Assessment Method:** Performance appraisals

**Performance Criteria:**

100% on given rubric

**Assessment Method:** Standardized national examinations

**Performance Criteria:**

84% or better on given exam

##### Final Exam

Complete American Heart Association's Basic Life Support (BLS) written final examination as required for healthcare professionals.

**Assessment Method:** Standardized national examinations

**Performance Criteria:**

84% or better on given exam

##### Ventilation

Demonstrate proper use of pocket mask, bag-valve mask and ventilation to an artificial airway during resuscitation attempts.

**Assessment Method:** Performance appraisals

**Performance Criteria:**

100% on given rubric

**Assessment Method:** Standardized national examinations

**Performance Criteria:**

84% or better on given exam

##### Automated External Defibrillation

Recall rationale and technique for automated external defibrillation.

**Assessment Method:** Performance appraisals

**Performance Criteria:**

100% on given rubric

**Assessment Method:** Standardized national examinations

**Performance Criteria:**

84% or better on given exam

##### Foreign Body Airway Obstruction

Demonstrate skills to assess and manage foreign body airway obstruction in infants, children and adults.

**Assessment Method:** Performance appraisals

**Performance Criteria:**

100% on given rubric

**Assessment Method:** Standardized national examinations

**Performance Criteria:**

84% or better on given exam

**Outline:**

Coronary Heart Disease

Relief of Foreign Body Airway Obstruction

Cardiopulmonary Resuscitation

Automatic External Defibrillation
