

Master Syllabus

AVT 1110 - Private Pilot Ground School

Division: Science, Mathematics and Engineering

Department: Aviation Technology

Credit Hour Total: 3.0

Lecture Hrs: 3.0

Date Revised: January 2014

Course Description:

Prepares students with the knowledge necessary to successfully complete the Federal Aviation Administration (FAA) Private Pilot knowledge exam. Topics include pilot training, aircraft systems, aerodynamic principles, safety of flight, air traffic control procedures, weather theory, weather hazards and conditions, federal aviation regulations, aircraft performance, weight and balance principles and navigation procedures. Both fixed -wing and helicopter sections are offered.

General Education Outcomes:

- ▣ Critical Thinking/Problem Solving
- ▣ Values/Citizenship/Community
- ▣ Information Literacy

Course Outcomes:

Weather Theory and Weather Analysis

Comprehend basic weather theory, identify sources of weather information, analyze weather factors, hazards and conditions.

Assessment Method: Locally developed exams

Performance Criteria:

80% correct response on exams

Aircraft Systems

Demonstrate a basic knowledge of aircraft systems, including airplanes, power plant and related systems and flight instruments.

Assessment Method: Behavioral observations

Performance Criteria:

Mastery of competency at 100%

Assessment Method: Locally developed exams

Performance Criteria:

Mastery of competency at 100%

Aerodynamic Principles

Comprehend and recognize the aerodynamic principles associated with an aircraft in the flight environment.

Assessment Method: Behavioral observations

Performance Criteria:

Mastery of competency at 100%

Assessment Method: Locally developed exams

Performance Criteria:

80% correct response on exams

Safety of Flight and Sources of Flight Information

Demonstrate a basic knowledge of safety of flight, air traffic control procedures and sources of flight information.

Assessment Method: Behavioral observations

Performance Criteria:

Mastery of competency at 100%

Assessment Method: Locally developed exams

Performance Criteria:

80% correct response on exams

Navigation Procedures

Demonstrate a basic knowledge of navigation procedures, including pilotage and dead reckoning and use of navigational aids in cross country flight planning.

Assessment Method: Behavioral observations

Performance Criteria:

Mastery of competency at 100%

Assessment Method: Locally developed exams

Performance Criteria:

80% correct response on exams

Outline:

Pilot Training and Aviation Opportunities
Aerodynamic Principles
Air Traffic Control Procedures
Sources of Flight Information
Federal Aviation Regulations
Weather Factors and Hazards
Navigation Procedures
