

Master Syllabus

CIS 2222 - ASP.NET with C#

Division: Business and Public Services

Department: Computer Information Systems

Credit Hour Total: 3.0

Lecture Hrs: 3.0

Prerequisite(s): CIS 1202

Date Revised: January 2014

Course Description:

This course introduces server side web programming to develop web applications based on ASP.NET technologies with Visual Studio. Students will learn how to develop ASP.NET applications employing web forms and data controls. Visual Studio will be used to develop these applications; Microsoft SQL Server will be used for database manipulations.

General Education Outcomes:

- ▣ Critical Thinking/Problem Solving
- ▣ Computer Literacy

Course Outcomes:

C# Syntax and Coding Conventions

Create Windows applications using C# syntax, instructions, and coding conventions.

Assessment Method: Locally developed exams

Performance Criteria:

70% or higher on a standard rubric

Assessment Method: Simulations

Performance Criteria:

70% or higher on a standard rubric

Creating a Secure Site with Forms Authentication

Design secure log in pages and access a secured database.

Assessment Method: Locally developed exams

Performance Criteria:

70% or higher on a standard rubric

Assessment Method: Simulations

Performance Criteria:

70% or higher on a standard rubric

Microsoft ASP.NET Web Application

Develop web applications using Microsoft's ASP.NET with C#.

Assessment Method: Locally developed exams

Performance Criteria:

70% or higher on a standard rubric

Assessment Method: Simulations

Performance Criteria:

70% or higher on a standard rubric

Outline:

Understand web design and create web based applications with ASP.NET and C#

Understand the advanced features and programming techniques in C#

Understand the fundamental aspects of programming for internet based applications, including the client-server model, automated data processing and transfer over the web, interactive and executable web applications, user controls, HTML, XML, JavaScript, CSS, AJAX, JQuery, data sources, data sources, and web site deployment.
