

Master Syllabus

VET 2200 - Veterinary Technology III

Division: Health Sciences

Department: Veterinary Technology

Credit Hour Total: 8.0

Lecture Hrs: 8.0

Other Prerequisite(s): Restricted to Majors

Date Revised: October 2013

Course Description:

Continues to help develop an understanding of the need for diagnostic testing to determine the best way to treat large and exotic animals. Discussion of techniques employed to retrieve, handle, and evaluate samples. Continued discussion of the use of radiology, pharmacology, and records management in Veterinary Medicine. Advances the student's understanding of sterile technique, surgical technique and assistance, and anesthesia application, monitoring, and recovery in animals.

General Education Outcomes:

- ❑ Oral Communication
- ❑ Critical Thinking/Problem Solving
- ❑ Values/Citizenship/Community
- ❑ Computer Literacy

Course Outcomes:

Sample collection, venipuncture, advanced handling

Demonstrate appropriate technique with sample collection, animal restraint, and laboratory management

Assessment Method: Locally developed exams
Performance Criteria:

Score of 80% or better on exams

Assessment Method: Performance appraisals
Performance Criteria:

Score of 80% or better on evaluations

Assessment Method: Simulations
Performance Criteria:

Score of 80% or better on evaluations

Assessment Method: Standardized national examinations
Performance Criteria:

Score of 75% or better on VTNE

Veterinary anesthesia and post anesthesia recovery

Discuss advanced application of anesthetic agents and monitoring as well as recovery and pain relief in the veterinary setting.

Assessment Method: Locally developed exams
Performance Criteria:

Score of 80% or better on exams

Assessment Method: Performance appraisals
Performance Criteria:

80% or better on evaluations

Assessment Method: Simulations
Performance Criteria:

80% or better on evaluations

Assessment Method: Standardized national examinations
Performance Criteria:

75% or better on National Exam

Pharmacologic physiology, management, office skill

Using information gleaned in VET 2101; discuss the effects of pharmacologics on animal anatomy; develop professional office skills. Perform inventory management within a mock hospital setting. Apply knowledge of anesthetic agents and monitoring in a mock hospital setting.

Assessment Method: Locally developed exams
Performance Criteria:

Score of 80% or better on exams

Assessment Method: Performance appraisals
Performance Criteria:

80% or better on evaluations

Assessment Method: Simulations
Performance Criteria:

80% or better on evaluations

Assessment Method: Standardized national examinations
Performance Criteria:

75% or better on VTNE

Outline:

- Review safe animal handling and restraint
 - Venipuncture in small companion animals
 - Collection and storage of blood samples for different tests
 - Collection and evaluation of fecal samples via direct smears, flotation, and centrifugation
 - Collection and evaluation of urinary samples
 - Collection and evaluation of dermatological samples
 - Discussion of the collection of other types of samples and case-based discussion on when these would be necessary
 - Clinical pathology and immunology
 - Use of ultrasound, CT, MRI, and other diagnostic imaging techniques
 - Different classes and uses of medications: i.e. antibiotics, antifungals, anesthetics, pain relief, cardiac, pulmonary, and renal medications.
 - Laws and documentation with controlled substances
 - Legal ramifications of proper and improper medical documentation
- Common methods of medical documentation
- Common medical terminology and abbreviations used in medical notes
 - Common medical terminology and abbreviations used in medical notes
 - Monitoring of the anesthetized animal
 - Recovery
 - Proper pain relief
